SUBJECT INDEX

The logic followed for this index was to classify each article published into subject areas with subheadings, if needed, for greater specificity. If a particularly unique statistical method or a significant discussion of the statistical method was put forth by the author(s), then the article is also categorized by the method. In addition, if the sample is unique or identifiable by industry, gender, country of origin, job titles, and so forth, then the article is classified under an appropriate heading.
